iDecide

An Innovative Toolkit for
Inclusive Decision
Making Policies

Erasmus+

About the Project

The iDecide Project aims to develop an innovative toolkit and induction course to support evidence-based policy making that can lead to the reduction of disparities in learning outcomes and marginalisation, by supporting school leaders, school staff, and policymakers to engage in shared and inclusive decision making. By implementing the toolkit and collecting rich data, we aim to understand the complexities of how decisions at school level influence marginalized groups and develop concrete recommendations for policy and practice on how to engage in shared decision making, giving voice to all stakeholders.

Goals of the Project

To develop an innovative toolkit and an induction course (face-to-face & on-line) for school leaders and school staff, based on effective principles and processes to promote shared decision making regarding the development, implementation, evaluation and improvement of inclusive policies.

To support evidence-based policy making which can lead to the reduction of disparities in learning outcomes and marginalisation in schools.

To support the EU in reducing disparities in learning outcomes affecting learners from disadvantaged backgrounds.

To strengthen cooperation & exchange of information and good practices between different areas of Europe.

Toolkit

Upon completion the iDecide toolkit will be an easy to use package with resources to support school leaders and school staff to make decisions at school level. It will include brief summaries of research findings, checklists, decision making flowcharts, practical tips, web tools and web apps, along with details on how to engage in inclusive decision making at the school and policy levels. Features will also include a mobile app, an eLearning environment and an induction course on how to use the toolkit.
